

EZ-SLIX

ASPHALT RELEASE AGENT

TECHNICAL DATA

GENERAL DESCRIPTION

EZ-SLIX is a scientifically formulated water based, anti-stick coating developed for use on asphalt truck beds and other paving equipment.

AREAS OF APPLICATION

Widely used by construction companies, institutional and municipal asphalt equipment, spreaders, automatic shovels, wheel barrows and all types of road equipment such as pavers, shovels, rakes, graders, rollers and trucks.

SPECIAL FEATURES

Highly Effective - efficient barrier to the adherence of asphalt or asphaltic based materials on any type of equipments surfaces.

Easy To Use - simply dilute and then spray of brush onto any surface to be protected.

Colour Indicator - allows visual verification of concentration levels.

Versatile and Economical - saves buildups from limiting loading capacity and/or equipment efficiency. Makes equipment cleaning easier. Can be used for any type of asphalt equipment from vehicles and asphalt processing facilities to shovels and rakes.

USE DIRECTIONS

Truck Beds and Paving Equipment: Brush or spray on the inner walls and bed of the truck's body to prevent packing or piling of the material being hauled.

Dilute 5:1 - 30:1. Since compositions vary, test various dilutions for optimum results. Product has dye indicator for automated spray equipment. If clear increase concentration of EZ-SLIX.

PHYSICAL PROPERTIES - LIQUID

EZ-SLIX consists of high quality silicates and surfactants.

Type	Asphalt Release Agent
Appearance	Clear Pale Red Liquid
Odour	Mild
Viscosity	Slightly Viscous
pH (concentrate)	11 - 12
Flammability	Non-Flammable
Specific Gravity	1.2
Solubility in Water	Miscible in Water
Toxicity (concentrate)	Serious Eye Irritant
Skin/Inhalation Irritant; Avoid Inhalation/Ingestion	

**FOR USE IN
INDUSTRIAL, INSTITUTIONAL,
COMMERCIAL and MARINE ENVIRONMENTS**

PACKAGING

210 L Drum; 23 L Pail; Case (4x4L cans)
